Monitor, manage and audit BI data connectivity
- **APOS Storage Center**
System content archive, backup, versioning and selective restore
- **APOS Publisher**
Systematic and tailored document production and distribution
- **APOS Validation Manager**
Automated report testing and validation

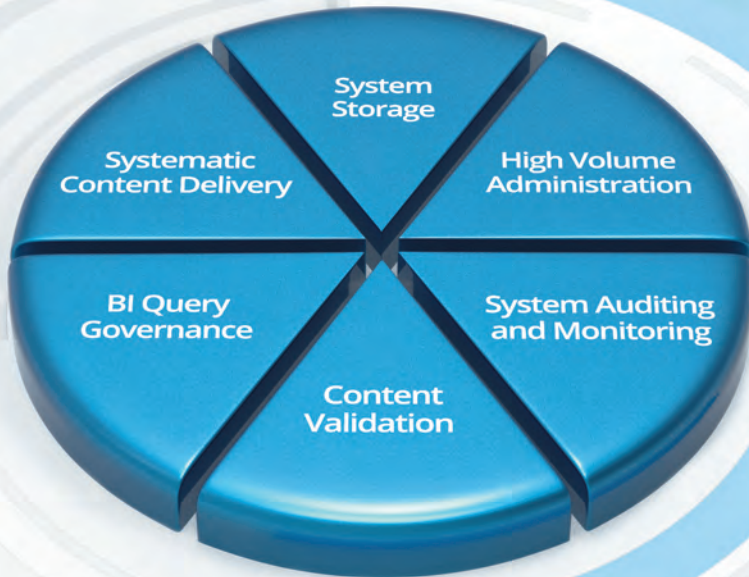

“
The APOS solutions have been of great value in providing visibility into our system, allowing us a comprehensive view of our system's structure and security... To understand proactively what is not performing well and to get at the root causes of those performance issues is a key benefit to the APOS solutions we have implemented.

”
NILADRI CHOWDHURY,
HP ENTERPRISE SERVICES

Well Managed BI

APOS Well Managed BI Solutions

Formed in 1992, APOS Systems is a global provider of solutions which enable well managed business intelligence.

APOS solutions improve the return on your BI investment through enhanced BI platform management, providing: automated and simplified administration; detailed platform auditing and monitoring; robust archive, backup and restore capabilities; enhanced content publishing and distribution; detailed BI query awareness and controls; and targeted solutions to speed and streamline your platform migrations.

APOS solutions simplify, automate, complement and extend your BI platform management practices.
