Expand Data Access for SAP Analytics Cloud

Live, Import and Export connections to non-SAP sources

Today's Session Key Topics

- Introduction
- SAC Data Connectivity
- APOS Data Gateway
- Expanded Import Connectivity
- Bi-directional Data Movement
- Exporting SAC Data
- Expanded Live Connectivity
- Q&A see webinar console

Today's Presenters:

ALLAN PYM COO APOS

ALAN GOLDING Solution Consulting Manager APOS

- Formed in 1992
- Focus on BI & Analytics solutions
- Software solutions to enable BI platform management, BI report publishing, and analytics data connectivity
- Simplifying, automating, extending SAP Analytics Cloud, SAP BusinessObjects, and SAP data analytics
- Strategic SDK development and consulting
- Hundreds of customers globally

HOUSEKEEPING

You will have access to the slides via email

You will get the recording within 24 hours

Download the handouts in the panel Tell us how we did in the survey

APOS Solutions for SAP Analytics Cloud

APOS Publisher for Cloud

- Automated broadcasting and distribution of personalized SAC reports to target user groups
- Distribute reports to the right people, right time, right location, right format
- Analysis for Office broadcasting and scheduling

APOS Data Gateway

- Live connectivity from SAC to wide range of data sources
- Import data from wide range of sources into SAC
- Extract and Export data from SAC

SAP Analytics Cloud – Connectivity Options

SAC Connectivity

Modelled & secured in SAC

۲

Live Connection

- Data leveraged from existing location, no data movement
- Focused queries against existing source via SAC browser
- Connection into existing source modelling & security
- Supports SAC Business Intelligence
- SAC Planning + Predictive not supported

Expanded SAC Connectivity

1001

Full Cycle Planning Data

Bi-Directional Data Process

Alan Golding Solution Consulting Manager APOS

Direct SAC Import connection

No SAP Cloud Connector/Agent required

- Easy to deploy
- Secure communication
- Scheduled data uploads
- Full or Delta data uploads
- Field Mapping
- Data Modelling

Ģ

APOS Import Data Gateway

ΦΑΡΟS

APOS Import Data Gateway SAP **Direct Extract and Load of SAC data Analytics Cloud** Secure communication • Scheduled data exports • Extract SAC Planning data • Load into external database • Load into CSV file **APOS Import Data Gateway** (・く・) Applications Cloud Relational OLAP Hadoop **On-Prem &** Data Data Data Data Cloud APOS

Supported Data Sources

- Amazon Athena
- Amazon Aurora
- Amazon EMR
- Amazon Redshift / Redshift Spectrum
- Amazon S3
- Azure Analysis Services
- Azure Cosmos DB
- Azure Data Lake
- Azure SQL Database
- Azure SQL Data Warehouse
- Cloudera
- Databricks
- DB2

- Denodo
- Google Analytics
- Google BigQuery
- Google Cloud Platform
- Hortonworks
- Informix
- Microsoft SQL Server
- Microsoft Analysis Services
- Azure Blob
- Mongo DB, Mongo DB Atlas
- MySQL
- Netezza
- Oracle

- Oracle Exadata
- Palantir
- Postgres
- Presto
- Salesforce
- Snowflake
- Sybase IQ, Sybase SQL Anywhere
- Teradata
- SAP BusinessObjects Universes (UNV, UNX)
- SAP BW version 7.3 and higher
- JDBC connectivity

Extended Data Sources: 100+ additional data source and application connection options <u>https://www.apos.com/content/apos-live-data-gateway-data-sources-supported</u>

Secure Communication

 OAuth is used when communicating with SAC, SharePoint and Salesforce via API access

• Secure communication to databases happens through JDBC drivers and user authentication

Full or Partial Data Uploads

Multiple data load options offered

- Full load
- Incremental load
- Truncate data first
- Overwrite

SAC Import methods supported

- Master and fact data update
- Master data update
- Fact data append
- Fact data clean and replace
- Fact data update

Field Mapping

You can map your source and destination fields so that data is correctly and effectively imported.

This is possible whether you are importing data into an SAC Model, or to any other type of database.

Data Modelling

There is also the option to model your data in our web-based Data Preparation Layer.

This allows you to target specific datasets you wish to import, rather than importing a full database.

Data Preparation Layer

Data Preparation Layer

Key Functions

- Define Measures and Dimensions
- Define what data fields are exposed
- Manage table joins
- Optimize with data transformations

SAC Planning Data Extract

On top of being able to import data into an SAC Planning model we offer the ability to extract data out of an SAP Planning model.

This extraction process allows you to load data back to the source database.

- Load SAC Budgeting data back into original source system
- Leverage enhanced SAC Planning data in other related processes

Strategic Data Movement

For non-SAC scenarios:

Scheduled data loads between different database platforms.

Removes complexities of data migrations and allows for data transformations between migrations.

Near Real-Time Import Data

- Frequent data uploads
- Delta-only data uploads

Combining these two features allows for import processes load only new data on a frequent basis to have SAC imported data being near real-time, even if a live connection isn't available.

Near real-time data means that both SAC Planning and SAC BI users can benefit from very current data.

APOS Live Data Gateway

APOS Live Data Gateway – Unlock Live Data

APOS Live Data Gateway is a middleware platform which provides virtualized data connection and data transformation to enable <u>live</u> data connectivity and expanded data source options for SAP Analytics Cloud, with a primary focus on **non-SAP data sources**.

Leverage data from its current location

No movement or importing of data

Leverage existing security models

Data is always current

Data never leaves the firewall

No added data storage requirements

APOS Live Data Gateway – Expand Live Options

Using the APOS Live Data Gateway

Auvanceu Search

The APOS Live Data Gateway provides live data connectivity from SAP Analytics Cloud to an expanded set of on-premise data sources and cloud data sources.

Data provided through APOS Live Data Gateway is kept safely behind the firewall, with no data replication or data upload requirements, and no need to re-create or duplicate data models or data security.

The APOS Live Data Gateway is available on the SAP App Center.

Data Source Types Supported

The APOS Live Data Gateway provides live data connectivity for numerous data sources of OLAP, relational, data appliances, cloud, and legacy SAP data source types:

 Relational Data Sources: Microsoft SQL Server, Oracle, IBM DB2, Sybase IQ, Sybase SQL Anywhere, MySQL

Data Appliances: Teradata Netezza

Database Virtualization Layer

Cloud

Data

Relational

Data

Data Virtualization Layer

Key Functions

- Establish direct connectivity and communication with data source
- Communicate query requests
 and receive query results
- Manage database authentication and security integration, SSO
- Additional connectivity options: (Data, XMLA, JSON, REST, API, etc)

OLAP

Data

Hadoop

Data

Applications

On-Prem &

Cloud

Database Preparation Layer

Data Preparation Layer

Key Functions

- Define Measures and Dimensions
- Define what data fields are exposed
- Manage table links and joins
- Set meaningful field names
- Optimize with data transformations

Database Consumption Layer

Data Consumption Layer

Key Functions

- Establish direct connectivity and communication with SAC User browser
- Supply data via SAP Native Protocol for SAC Story and SAC Application actions

5 Simple Steps to Live Connectivity

Create Connection from Live Data Gateway to data source Create View in Live Data Gateway Create Connection from SAC to Live Data Gateway Create Model in SAC Create Report in SAC

Demonstrating the 5 Steps

Data Preparation

Date Dimensions

- Create date hierarchies on non-hierarchical data
- Simplified user navigation and experience
- Improved analysis
- Custom date dimensions support
- Hierarchical date dimension support
 - Drill Down
 - Time Series Charts
 - Variance Charts
- Hierarchies available as individual dimensions

Custom Hierarchies

- Create custom hierarchies on nonhierarchical data
- Simplified user navigation and experience
- Improved analysis
- Provide ability to create custom dimensions on non-hierarchical data
- Simplified user experience for building and consuming analytics
- Drill down functionality for non-datebased dimensions
- Level Type Hierarchies will be supported

		24.35 107.418 102.57% 40 24.35 40 102.57% 40 24.35 40 102.57% 40 24.35 40 102.57% 40 74.18 40 23.57% 40 24.35 40 74.18 40 23.57% 40 24.35 40 35.57% 40						3

1200025837	29/01/2022	8:02:00 AM	4	477		294.65	USD	
1200025838	29/01/2022	8:03:00 AM	51	76	CFT13155	135.72	USD	

Variables Support

- Powerful data filtering
- Simplified user experience
- Improved analysis
- Create custom variables
- Supported in both Client Tool and Web UI
- Utilize formulas
- Utilize full set of values or custom set of values

Database Passthrough

- Optional database passthrough rather than building APOS semantic layer views
- Direct access to database tables or views
- Automated defining of measures & dimensions
- Removes need for duplicate modelling
 when already exists
- Access full database catalogue

Data Blending

- Combine data from two different data sources and present as one source to SAC
- APOS View unifies data from two sources in live mode
- Consolidate virtualized connections

Data Blending

- Leverage data from multiple sources into individual analytics
- Extract business value from multiple data sets
- Reduce data movement

Security

APOS Live Data Gateway – Security

Single Sign On

- Unified security authentication
- Integrated to enforce data base security
- Simplified user experience
- Various SSO options supported
- SSO Technologies we work with:
 - SAML
 - Azure AD
 - OKTA
 - Google Cloud IDP
 - OAuth

- Kerberos with WinAD
 - Keypair Authentication
 - User Impersonation
 - Pre-Defined Cached User

Performance

Performance Considerations

- No data being stored
- Data being read from source database
- No caching of data
- New queries initiated with each data request within SAC

APOS Live Data Gateway – Performance Results

- 288 billion row data set
- 10.5 Terabytes
- On-the-fly aggregated queries

• Sub-2 second response time!

Solution Overview

APOS Data Gateway – Session Summary

• APOS Import Data Gateway

- Expanded and simplified Import connectivity for SAC
- Extract and export SAC Planning data
- Strategic and bi-directional data movement
- APOS Export Data Gateway
 - Export and distribution of target data sets on schedule
- APOS Live Data Gateway
 - Direct Live connection options for SAC
 - Data Transformation, Security, High-performance

APOS Data Gateway – Next Steps

- APOS Data Gateway Resources
 - Webinar Follow up email
 - APOS Website <u>www.apos.com</u>
- Solution Demonstration
 - APOS Team member provides personalized presentation for you and your colleagues
 - Consider solution evaluation

APOS Solutions for SAP Analytics Cloud

APOS Publisher for Cloud

- Automated broadcasting and distribution of personalized SAC reports to target user groups
- Distribute reports to the right people, right time, right location, right format
- Analysis for Office broadcasting and scheduling

APOS Data Gateway

- Live connectivity from SAC to wide range of data sources
- Import data from wide range of sources into SAC
- Extract and Export data from SAC

APOS Solutions for SAP BusinessObjects

BI System Auditing

- System Inventory
- Security Analysis
- System Usage Analysis
- Report Impact Analysis

BI System Monitoring

- Advanced System Monitoring
- Operating Environment Monitoring
- Database Monitoring
- Process Monitoring

BI Report Testing

- Automated Report Testing
- Regression Testing
- Validation of Report Data
- Report Performance Testing

BI Query Surveillance

- Real-time BI Query Monitoring
- Query Performance Alerting & Auditing
- Query Intervention; Remote Cancelling
- Sensitive Data Audit

APOS Administrator

Object Management

- Bulk Security Management
- Bulk Settings Management
- System Objects Promotion
- Connections Maintenance

Schedule Management

- High-volume schedule management
- Multiple schedule properties editing
- Grid scheduling interface
- Repeatable scheduling templates

Instance Management

- Manage entire instance inventory
- Granular instance search
- Stop, pause, release, reschedule
- Rapid recovery to failed schedules

APOS Storage Center

- System Backup
- Content Archiving
- Content Versioning
- Selective Restoration
- Automated System Clean Up

- APOS Publisher
 - Systematic Content Delivery
 - Advanced Document Bursting
- Enhanced Content Distribution
- Security and Encryption
- Statement Generation

APOS Web Intelligence Migrator

- Bulk conversion of Universes from UNV to UNX
- High-Volume Repoint Web Intelligence reports
- Success validation
- Controlled, project-based workflow
